APPLE TREES

There's room on nearly every city lot for a few fruit trees, grapevines or berry plants.

APPLES, WHY NOT PLANT THEM NOW?

We quote two sizes only, 9-16 to 11-16, and 11-16 in. and up. This refers to the diameter of the tree, about two inches above the graft.

They are two years old; the former will be from three to four feet high, and the latter four to six feet.

9-16 to 11-6.....	Each 65c
11-16 up	Each 75c

Ten or more of one variety, 5c per tree less.

POULTRY FEED THAT MAKES WINTER EGGS.

Now that the hot weather is over, and most everyone has returned from a vacation, the old hens are fairly well through the moult, and the early pullets are about ready to lay, this is the time to begin feeding for heavy egg production.

Oakley-Pate's Meat and Milk Mash and Mixed Hen Feed properly fed will greatly increase the egg yield.

**TRY THEM AND
BE CONVINCED.**
